

Invitation to ASINDA 2026

Dear Company Representative,

Kemistklubben vid Åbo Akademi rf hereby invite Your company to ASINDA 2026, which will be held **Friday 23rd of January 2026 in the Aurum building** of Åbo Akademi University at Åbo campus. The recruitment fair ASINDA, Axels och Stinas industridag, is organized by students in chemistry and chemical- and process engineering at Åbo Akademi University, and is one of Kemistklubben's biggest annual events. ASINDA is mainly aimed at students within the programme for chemical- and process engineering and chemistry, however, the broadened marketing has resulted in increased interest among other subjects and faculties.

ASINDA aims to give students information about working life and establish contacts with possible future employers. Likewise, the event offers You the opportunity to become acquainted with our students. The event consists of a recruitment fair, a possible panel discussion and company presentations, which can be held in either Swedish or English. The publication ASINDA-bladet, in which You have the opportunity to advertise Your company, will be published during the fair. Additionally, if Your company cannot physically attend the fair, You have the opportunity to participate by ordering a company poster. As per tradition the day concludes with a cocktail and an evening get-together with our students.

The registration deadline for Your company is **Friday 21st of November 2025**, after this date, the registration is binding. The number of places is limited. A confirmation e-mail of registration will be sent to the contact person within three business days, and signed up companies will receive further information by e-mail.

To register, please contact asinda@abo.fi

Breakfast, lunch, coffee, cocktail and evening get-together for the company representatives are included in the prices. We have a limited amount of seats for the cocktail and evening get-together and **therefore we can only offer You two seats per company for this part of the event.**

The profit from the fair goes to Kemistklubben and its activities.

We wish You a warm welcome

Simon Sundström
